Customization Options

Each cap is supplied in one of these versions.

Venting gasket — Equalizes pressure inside the canister. For contents that release gas or expand with temperature changes.

PE-liner — A polyethylene liner inside the cap seals against the canister neck when the cap is screwed on.

Solderable foil — A foil liner is sealed onto the canister neck after filling, giving a leak-resistant closure.

Optional add-on — Tamper-evident ring

The specifications mentioned are an indication and may vary within the permitted tolerances.
